2008 Raptor Report for Scofield Waste Rock Site Skyline Mine

Per commitments outlined in Section 2.10 of the currently approved M&RP, a previously used raptor nest located at the Scofield Waste Rock site was monitored for activity in the Spring of 2008. The nest was monitored for raptor activity on the following dates in 2008:

- March 18
- April 25
- May 16
- May 30
- June 17
- June 25

At no time during the above-listed dates were signs that the nest was being actively used by raptors in 2008. The re-allocation project was initiated with the mobilization of equipment on June 17, 2008.

No additional monitoring of the nest is scheduled in the future.
